

MoneyThumb Salesforce Release Notes

1. Version 8.0

1.1. Package URL

The following shows the link to the latest package:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04tQy000000XW17>

 **Warning:** Always test the installation in a Sandbox environment first.

For installation details, see the MoneyThumb Salesforce Installation, Configuration, and User Guide.

1.2. Enhancements

- Added Prequalify results section. If you have Prequalify enabled, the **Approved** or **Declined** result now appears in the Applicant Info section, including sections that display passed or failed rules.
 - If an application has an **Approved** decision, the **Prequalify Passed Rules** section appears and displays all the rules that passed.
 - If an application has a **Declined** decision, the **Prequalify Rules** section displays the rules that failed along with both the threshold value and actual value. If any rules pass, they appear in the **Prequalify Passed Rules** section.

To enable Prequalify in your MoneyThumb account, contact [Support](#).

- Added Decline List section in Scorecard. This section shows a record of banned MCA or recovery companies shown in an application.
